BRAND IDENTITY · COMPLETE SUMMARY

BRAND NAME

Got Messy.

Names the user's feeling before they've read a single word. Two casual words. Conversational cadence. Impossible to forget.

LEAD TAGLINE

"You got messy. We got you."

Mirrors the domain exactly. Sounds like a friend picking up the phone. Two runner-up options: "Clean words from messy thoughts." and "Just paste it. We'll figure it out."

TARGET AUDIENCE

Non-Technical Users

Social media managers, solopreneurs, executive assistants, freelance copywriters — people who know what great output looks like but can't ask for it yet.

BRAND VOICE

Warm · Direct · Human

Sounds like a brilliant friend, not a product. Never condescending. No jargon. Says what it means. Lightly playful — a raised eyebrow, not a stand-up set.

COLOR SYSTEM

Warm Clay · Deep Ink · Cream · Old Dust

Plus four tool accents: Sage (Sort It Out), Lavender (Mirror It), Muted Sky (Make It), Warm Yellow (Just Tell Me). No cold blues or sterile greys.

TYPOGRAPHY

Lora (Display) + Poppins (UI)

Lora italic feels like cleaned-up handwriting — mirrors what the app does. Poppins is friendly and readable. Never use Inter, Roboto, Arial, or system-ui.

THE FOUNDING INSIGHT

You already know what great output looks like.

You just don't know how to ask for it.

MirrorMind removes that barrier by letting you deconstruct any high-quality output into the exact prompt structure that created it — saved as a reusable template you own. This is the founding concept behind Got Messy, consolidated from a 15-idea Reverse Prompt Engineering concept matrix.

CORE MECHANIC — THREE STEPS

See Great Output

Find any high-quality AI output anywhere on the internet.

1

Deconstruct It

Mirror It reveals the Persona, Task, and Format hidden inside.

2

Own the Template

Save a fill-in-the-blanks reusable prompt to My Good Stuff.

3

HUB & SPOKE — 4 NAVIGATION MODULES

2.0 The Architect

CORE SPOKE · MVP

1.0 Home Dashboard

3.0 The Vault

LIBRARY

4.0 Settings

CONFIGURATION

THE ARCHITECT — 4 BUILD PHASES

**The Drop**

Smart Paste · Intent Classifier · PII Sanity Check · Pillar Mapping

**Triple-Pillar**

Persona Selector · Task Definer · Format Gallery · Context Manager (2.2.4)

**Test Flight**

Split-Screen Simulator · Variable Injector · Hallucination Risk Score (V2)

**Export**

Copy to Clipboard · Save to My Good Stuff · Share with Team · Open in AI

6-TOOL SUITE · HUMAN NAMES · VERB-DRIVEN

Mirror It

FLAGSHIP

Paste great output · deconstruct it · own the template. The founding concept. Based on MirrorMind RPE concept from the 15-idea research matrix.

The Drop

MVP

Paste anything — emails, notes, voice transcripts. Smart Paste organizes the chaos automatically via Intent Classifier NLP.

Sort It Out

V1

Dump Zone · Analysis Animation · Structured Context + Goal blocks · Send to Make It. Transforms messy notes into structured prompt input.

Make It

V1

Manual crafter. Area Selector · Role & Task (DNA-prefilled) · Tone & Mode (Professional/Empathetic/Witty + Creative vs Precise). Output.

Just Tell Me

V1

State a plain-language goal · Intent Analysis routes to Create or Sort · Optional Web Search · delivers a fully populated prompt.

My Good Stuff

LIBRARY

All saved templates organized by Life Area. Community Recipes. Remix any prompt back into Make It. Prompt Detail Card with Live Tags.
